Subject	TUBING, WIRE, AND CABLE PACKAGING REQUIRMENTS

TUBING, WIRE AND CABLE PACKAGING REQUIRMENTS

Seller shall ship tubing, wire and cable according to the following guidelines

- Wire, cable, and braided or silicon sleeve shall be supplied on a spool unless the standard MFG packaging is a box.
 - Spool size should be appropriate to the amount of material being provided.
 - If possible, spool sizes should be no larger than 12 inches wide and no taller than 12 inches.
- Wire and Cable should be supplied with as few splices as possible.
 - If QAP_20 is present, then no splices are permitted.
- Standard heat shrink shall be supplies on a cardboard reel/spool (not loose).
 - Spool size should be appropriate to the amount of material being provided.
 - If possible, spool size should be no larger than 24" in diameter
- Specialty heat shrink such as Kynar, Teflon or Adhesive Lined material in stick form unless otherwise specified on the PO or agreement.
